Entuit is the industry leading developer of hardware solutions for the Municipal Lighting, Building Automation, HVAC, Indoor Lighting, Sub-metering and many other applications. We offer a complete line of wireless control units which fills a unique niche in building automation and energy consumption.

Our products encompass inside and outside lighting, HVAC, advanced metering and various other building automations requirements. The versatility of our system allows all your building needs to be brought under one platform, eliminating the need for several software packages. We provide wireless solutions for Lon Works, BAC Net, Mod Bus and Ethernet. We utilize the Tridium JACE, Intellistar Gateway, Niagara Language, Sedona and Invergence for many of our solutions.

WCG concerns itself with the sales, engineering and installation of wireless controllers and integrates all these aspects into a seamless platform for various scenarios.
